

EVCS CHECKLIST City of Larkspur Building Department 400 Magnolia Ave. Larkspur, CA 94939 (415) 927-5038

OFFICE USE ONLY	
PERMIT NO.:	

Please complete and sign the worksheet and submit with a completed building permit application.

This worksheet contains the technical aspects of an Electric Vehicle Charging Station Equipment installation and is intended to help expedite the permitting of EVCS. This worksheet substantially follows the "*Plug-in Electric Vehicle Infrastructure Permitting Checklist*" (Page 111) contained in the governors *Governor's Office of Planning and Research "Zero Emission Vehicles in California: Community Readiness Guidebook"* <u>http://www.opr.ca.gov/docs/ZEV_Guidebook.pdf</u>

PROPERTY/WORK DESCRIPTION

Site Address:			APN:	
Commercial: Tenant name, and Suite Number:				
Work Description:				
SINGLE FAMILY	MULTI FAMILY (APT)	MULTIFAMILY (CONDO)	PUBLIC RIGHT-OF-WAY	
COMMERCIAL (SIN	GLE)	COMMERCIAL (MULTIPLE)	MIXED-USE	
Location and Number of EVCS to be Installed:				
Garage:	Parking Level(s):	Parking Lot:	Street Curb:	-
EVCS Charging Level:	Level 1 (120V)	Level 2 (240V)	Level 3 (480V)	
Maximum Rating (Nameplate) of EV Charging System Equipment = kW				
Voltage EVCS = V Manufacturer of EVCS:				
Mounting of EVCS:	Wall Mount	Pole Pedestal Mount	Other:	
System Voltage:				
120/240V, 1	120/280V, 3φ, 4W	120/240V, 3φ, 4W 277/480	0V, 3φ, 4W Other:	
Rating of Existing Main Electrical Service Equipment = Amperes				
Rating of Panel Supplying EVCS (if not directly from main panel): = Amperes				
Rating of Circuit for EVCS: Amps / Poles				

A.I.C Rating of EVCS Circuit Breaker (if not single family, 400A) = _____ A.I.C.

Specify Either Connected, Calculated or Documented Demand Load of Existing Panel:

- Connected Load of Existing Panel Supplying EVCS = _____ Amps
- Calculated Load of Existing Panel Supplying EVCS = _____ Amps
- Demand Load of Existing Panel or Service Supplying EVCS = _____ Amps

(Provide Demand Load Rating for Electric Utility i.e. PG&E)

Total Load (Existing plus EVCS Load) = _____ Amps

For single family dwellings, if existing load is not known by any of the above methods, then the calculated load may be estimated using the "Single-Family Residential Permitting Application Example" in the Governor's Office of Planning and Research "Zero Emission Vehicles in California: Community Readiness Guidebook" http://www.opr.ca.gov/docs/ZEV Guidebook.pdf

EVCS Rating: _____ Amps x 1.25 = _____ Amps = Minimum Ampacity of EVCS Conductor = # _____ AWG

For Single-Family: Size of Existing Service Condutors = # _____ AWG or kcmil

OR

Size of Existing Feed Conductor Supplying EVCS Panel = # _____ AWG or kcmil

OR

Verify with Inspector in field

NOTE: A charging station may include essential signage, parking lot striping, wheel stops, bollards and other similar directional and safety improvements as necessary for safe operation of EVCS equipment. Ancillary features proposed beyond those necessary for safe operation of EVCS equipment designed in compliance with Article 625 of the California Electrical Code, such as fences, lighting, canopies, promotional signage, and other similar improvements, may be subject to applicable local zoning and building regulations and review.

The Building Official may require an applicant to apply for a use permit if the Building Official finds, based on substantial evidence, that the electric vehicle charging station could have a specific, adverse impact upon the public health and safety.
